AMU Engineering students design hybrid vehicle

Aligarh, October 20: Energy efficiency can improve the economic competitiveness of countries and businesses, as well as reduce greenhouse gas emissions and improve the quality of life. Having realised the growing demand for alternative energy sources, Green Warriors, a team of Zakir Husain College of Engineering and Technology (ZHCET), Aligarh Muslim University (AMU) students designed a hybrid vehicle that can be operated by charging the battery through non-conventional methods. The car has an intelligent system for pothole and hump identification on roads, ADAS and other e-Mobility systems.

Green Warriors members, Arquam Hashim Siddiquie (Captain), Mohammad Zain (Vice Captain), Aditya Kumar Singh (Treasurer), Jyoti Kumari (Manager), Aryan Varshney, Yash Singhal, Aakash Gupta, Prasun Jain, Tahseen Mirza, Sarfaraz Ibrahim and M Anas Habib presented the vehicle design at the Virtual Efficycle 2020 organised by the Society of Automotive Engineers India, where it has been evaluated for over two months on the engineering concepts and techniques.
